Full-Stack Web Development   March 2023 - May 2023

Project Experience

KodeGo - Full-Stack Web Development Bootcamp

BallerBootcamp (Mini-Project 1)   March 20-27, 2023

- Tools that I used: HTML, CSS, and Bootstrap.
- This is an individual project where I was able to practice my HTML and CSS skills. Also, I used GitHub for the deployment of this project.
- I used Figma in creating the wireframe of the website.

KodeGo - Full-Stack Web Development Bootcamp

Korean Delight Davao (Mini-Project 2)   April 18-26, 2023

- Tools that we used: HTML, CSS, and JavaScript.
- This is a group project where we were able to make the functionality of the website. We also used GitHub for the deployment of this project and Figma for the wireframe.
- My role is on different parts of the website which includes creating the specific pages and some of the functionality.

KodeGo - Full-Stack Web Development Bootcamp

Korean Delight Davao (Capstone)   May 15-29, 2023

- Tools that we used: HTML, CSS, JavaScript, ReactJS, Node.js, and MySQL.
- We are 2 in the group for this project where we were able to make a full-stack website. We also used GitHub for the deployment of this project just for the front-end and Figma for the wireframe.
- Since we are only in two, we decided to divide by assigning 1 for the front-end and 1 for the back-end. And my role hereto create the front-end of the website.
